More about "Generation Green"

Generation Green follows the journey of Patrick Hearps, a young chemical engineer working at an oil refinery, as he becomes increasingly concerned about his company's contribution towards adverse climate change. Torn between his career and a higher obligation of environmental stewardship, his personal struggle reflects the great dilemma of our generation. Patrick's courageous choices and eventual path forward highlight the actions needed to shape the world of tomorrow.

About producer Laura Noonan

Laura Noonan is a film producer/writer, with a strong interest in factual programming and documentary film-making. She produced 'Generation Green' with the direction of Briony Benjamin in 2012 as one of her graduate projects at QUT. For the last year, she has been working on marketing and distributing Generation Green.
