

1. Victorian Strategic Agenda

- Successful Cities
- Innovation in our Economy
- Professionalism

EA will assist the community

by:

- *sharing information and shaping the debate*
- *communicating and engaging with stakeholders*
- *offering solutions and leading good decision making*
- *being relevant and active on issues that matter*

2. The problem...and opportunity

Melbourne and our regional cities are home to 80% of Victorians and generate more than 80% of our economic output. Successful Cities are growing, vibrant and productive places. They matter for our health and well-being both personally and as a nation. Good decision making is critical to protect what we value now and deliver it for everyone into the future.
