## Space Industry and the Planet

The space industry is complex and lacking in environmental regulation. Furthermore, it is on the verge of a massive expansion due to advances in technology, new commercial business models, space tourism and re-useable rockets. This spells very bad news for the global ecosystem.

In this **exciting, multi-media presentation**, you will learn about re-useable rockets and the impacts on toxic re-entry debris. You will hear about mono-methyl hydrazine and nitrogen tetroxide.

You will be invited to consider the implications of stratospheric soot associated with new space tourism ventures. And you'll get to see some rockets go **BOOM!** Big time!

Join us for a thrilling multimedia event by hosted by two dynamic presenters.

## Drinks and Networking

Please join us for a few drinks and light supper after the presentation.

- For catering purposes **please register by 5pm on Thursday 14 May 2015.**
