

Cooperative Research Centre for
Infrastructure and Engineering Asset Management

AGIC – ASSESSMENT METHODOLOGIES WORKSHOP

Sustainable infrastructure: making it real

Date: WEDNESDAY 26TH OCTOBER 2011

Time: 8:30AM – 5PM

Venue: BRISBANE CONVENTION &
EXHIBITION CENTRE

Costs: Conference Delegate \$300
SSEE or AGIC Member \$350
Non Delegate \$400

[CLICK FOR REGISTRATION DETAILS](#)

Who should attend?

- Infrastructure owners, operators and managers
- Asset Managers
- Engineering designers and constructors
- Infrastructure project managers
- Risk management professionals
- Investment managers

Supported by:

What will you learn?

- Learn about the Australian Green Infrastructure Council (AGIC) sustainability rating scheme for infrastructure and what it means for your business.
- Understand the assessment methodologies used by the scheme, including themes, categories, credits and benchmarks, and discuss some of the results of the project trials
- Find out how to use the AGIC Rating Scheme and support tools
- Gain early insights into how to use the tool so you can position your projects for high AGIC sustainability ratings

The Australian Green Infrastructure Council (AGIC) together with the CRC for Infrastructure and Engineering Asset Management (CIEAM) is pleased to present this full day workshop. In conjunction with the SSEE 2011 International conference, "Escaping Silos".

For registration details, please go to:

PROGRAM AND PRESENTERS

Time	Session	Presenter
8:30 AM	Registration and Networking with Coffee	
9:00 AM	Welcome and introductions (CIEAM & AGIC)	David Hood
9:15 AM	AGIC Rating Scheme - Current status	Rick Walters
9:30 AM	Overview of categories and credits	Rick Walters
10:30 AM	Morning Tea	
10:50 AM	Pilot Trials - Outcomes to date	Rick Walters
11:15 AM	BREAKOUT SESSION - Category and Credit Benchmarks	All
12:30 PM	Lunch	
1:30 PM	Presentations and discussion	All
1:50 PM	Sustainability - a business imperative	Tony Stapledon
2:30 PM	Sustainability assessment, evidence and verification (focus on processes)	Rick Walters
3:00 PM	Afternoon Tea	
3:15 PM	BREAKOUT SESSION - Process issues in self assessment	All
4:30 PM	Presentations and discussion	All
5:00 PM	Close	David Hood

Dr Tony Stapledon

Dr Tony Stapledon was Group Sustainability Manager at Leighton Contractors, one of Australia’s major construction, mining, telecommunications, energy and industrial services companies.

With over 25 years’ experience in senior management and consulting, Tony is active in the Australian Green Building Council and a former AGIC Director. He was formerly a research director at the Institute for Sustainable Futures at University of Technology Sydney and from 1984 – 2001 was a director of global design company Woods Bagot. His PhD researched high performing sustainable organisations.

Professor David Hood

Professor David Hood is a civil and environmental engineer with vast experience across major civil and military projects, professional development in emerging economies, senior management in both the public and private sectors, and in engineering education.

Following a successful career in project management, David took over and commissioned Australia’s then new Parliament House in Canberra in the mid 1980s – a life changing career episode. Since that project, David has become increasingly involved in fostering a culture of sustainability across all engineering disciplines, and in the built environment. David is Chairman of the Australian Green Infrastructure Council and National Deputy President of Engineers Australia, as well as an accredited presenter for Al Gore’s Climate Project.

Rick Walters

Recently appointed to the role of Technical Manager of AGIC, Rick Walters is tasked with bringing the AGIC scheme to market. He holds more than 20 years experience in Sustainability, Environmental Management, Operations Management and Process Engineering with major Australian companies including Thiess, John Holland, Worley-Parsons and Rio Tinto. Rick is an accredited Principal Environmental Auditor, a past EIANZ NSW Committee Member and a Green Star Accredited Professional.

Rick has worked on the AGIC National Rating Scheme development since its inception in a voluntary capacity and his recent appointment will help AGIC deliver a practical rating scheme to industry by the target date of end 2011.
